

GENERAL DESCRIPTION

The N3860 is the low cost integrated, current mode PWM controller, specifically designed for using in the low power output, any universal and single input AC/DC converters, DC/DC converters, battery chargers, AC adapters or stand-by switching power supplies.

The N3860 features a burst mode function at light load condition, when output power works at light load and the duty of gate driver is under 1us, the N3860 will enter the burst mode condition to reduce operating frequency, this special function helps decrease power consumption to be Green Mode Requirement. The N3860 is capable of powers to 40W maximum for a universal line input.
