

Front View

* These parts function only with the optional audio card installed

Rear Panel and Left Side

*Available only with the optional internal fax/modem installed

Notebook Specifications

CPU and Memory

CPU Upgradable 486 microprocessor installed in a PGA socket; includes 8KB of internal cache in write-back mode and integrated math coprocessor

System speed Fast speed and slow speed (8 MHz) available; speed selection through Setup

Memory 4MB RAM soldered on the system board; configuration may include additional memory module; expandable up to 24MB using a 4,8,16, or 20MB memory expansion module

ROM 128KB Flash ROM device containing the system and video BIOS and Setup program code

Video RAM 512KB DRAM supports resolutions up to 640 x 480 in 256 colors on the color LCD and up to 1024 x 768 in 16 colors or 800 x 600 in 256 colors on external monitor

Cache 8KB internal; supports 256KB of external cache on a CPU daughterboard; selectable through Setup

Clock/ calendar Real-time clock, calendar, and CMOS RAM; backed up by internal battery

Controllers

Video Chips and Technology® 65535 video controller; 32-bit local bus interface to the microprocessor; supports enhanced video modes on an external monitor; supports resolutions from 640 x 480 in 256 colors on the color LCD and up to 1024 x 768 in 16 colors on an external monitor; automatic external monitor detection; simultaneous display with LCD screen using Fn F10 command or software

Diskette drive Built-in super I/O controller for one internal 3.5-inch diskette drive; supports 720KB and 1.44MB formats

Hard disk Built-in super I/O controller has interface to one 2.5-inch, IDE internal hard disk drive; automatically recognizes and configures drives up to 19 mm high that support the IDE interface

PCMCIA Built-in Vadem® VG-468 controller for two stacked slots; supports two Type I or II cards, or one Type III; PCMCIA version 2.01 and JEIDA 4.1 compatible; supports low power and suspend modes; supports hot insertion (including ExCA standards); register compatible with Intel 82365SL

Interfaces

External VGA Auto-sensing, 15-pin, D-sub, female connector for analog monitor

Parallel Centronics® compatible; 25-pin, D-sub, female connector; standard S-bit parallel; supports standard (AT compatible) and bidirectional (PS/2 compatible) modes

Serial	RS-232C, programmable, asynchronous, 9-pin, D-sub male connector
External keyboard/ mouse	Auto-sensing, 6-pin mini-DIN connector for a PSI 2-type external keyboard, keypad, or pointing device
Phone jack	Standard RJ-11 connector with optional internal fax/ modem installed
Speaker	Internal; automatically disabled when optional audio card is installed and Line-out is used
Audio input and output	Connectors for microphone, Line-in, and Line-out when optional audio card is installed
Port replicator	Connector for ActionPort™ replicator

Keyboard 85 keys; 101-key keyboard compatible; embedded numeric keypad; **Fn** key for hot key commands

Trackpad Built-in pointing device with two buttons

Fax/Modem Optional internal 14.4 baud send/ receive fax/ modem

Volume Control Knob adjusts sound of internal speaker or audio card (if installed)

Mass Storage

Hard disk drive One removable internal IDE hard disk drive, 2.5-inch form factor; maximum height 19 mm; Setup automatically recognizes and configures drives that support the IDE interface; parameters for the Toshiba MK1824FCV are as follows:

Capacity	335MB	Sectors	63
Heads	16	WP Com	0
Cylinders	682	Landing Zone	682

Diskette drive Internal 3.5-inch diskette drive; 720KB or 1.44MB format; supports lower power consumption

LCD Screen

Screen type (all backlit)	Monochrome	Passive color	Active color
Resolutions and colors	640 x 480, 64 gray shades	640 x 480 256 colors	640 x 480 256 colors
Diagonal measurement	9.4 inches	10.3 inches	10.4 inches

Setup Program Stored in ROM; accessible by pressing F8 at system startup; includes power management utilities

Software

Latest versions of MS-DOS® and Microsoft Windows™ Borland® SideKick® for Windows; ClarisWorks® for Windows; trial versions of CompuServe® WinCIM,® America Online,® and OAG FlightDisk;® drivers and utilities for PCMCIA card slots, video system, and trackpad; on-line version of User's Guide, Windows manual, and other manuals; power management utilities; all installed on the hard disk drive; refer to Software Support Card for details on EPSON's support policy

LED Panel

Icon	Name	Meaning
	Power	Computer is on
	Suspend	Green -Standby mode; press any key to return to full power Flashing green -Suspend mode; press Suspend/Resume button to return to full power
	Charge	Orange -battery is charging normally Green -battery is fully charged Flashing orange -battery is not installed correctly or is damaged
	Diskette drive	Computer is accessing the diskette drive
	Hard disk drive	Computer is accessing the hard disk drive
	PCMCIA	Computer is accessing a PC card
	Num Lock	Num Lock is on, which activates the embedded numeric keypad
	Caps Lock	Caps Lock is on
	Scroll Lock	Scroll Lock is on

Power Sources

AC adapters

Specification	Lightweight AC adapter (A882051)	International AC adapter (A882101)
AC connection	2 folding connectors	6 ft (2 meter) cable
DC cable	6 ft (2 meters)	6 ft (2 meters)
Input voltage	100 VAC to 240 VAC	100 VAC to 240 VAC
Input frequency	50/60 Hz	50/60 Hz
Output voltage	19 VDC, 1.23 Amp maximum	19 VDC, 1.5 Amp maximum
Length	3.4" (86 mm)	3.4" (86 mm)
Width	2.2" (56 mm)	2.2" (56 mm)
Height	1.1" (28 mm)	1.1" (28 mm)
Weight	7.8 oz (220 g)	9 oz (255 g)

Battery Rechargeable 12 Volt NiMH battery; current regulation by thermistor

Caution
Use only the adapters and replacement batteries designed for use with the ActionNote 800 series (lightweight AC adapter A882051, international AC adapter A882101, auto adapter A882241, and battery A882291).

Environmental Requirements

Condition	Operating	Non-operating
Temperature	42° to 95° F (5° to 35° C)	-4° to 140° F (-20° to 60° C)
Humidity (non-condensing)	30% to 90%	5% to 95%
Altitude	--200 to 12,000 ft (--67 to 4,000 m)	--200 to 30,000 ft (--67 to 9,000 m)
Acoustical noise	35 dB @ 1 meter (maximum)	

Caution
When traveling by airplane, take the computer into the passenger compartment to prevent it from being stored in an unpressurized storage compartment.

Physical Dimensions

Model	Depth		Width		Height		Weight	
	in.	mm	in.	mm	in.	mm	lb	kg
Monochrome	8.8	220	11.7	292	1.6	40	5.5	2.5
Color	8.8	220	11.7	292	1.7	43	6	2.7

Optional Equipment

- 4MB, 8MB, 16MB, or 20MB memory expansion module
- 520MB removable hard disk drive
- 14.4 internal data fax/ modem
- 16-bit stereo audio card
- Additional NiMH batteries
- Extra AC adapter or international AC adapter
- Adapter for an automobile cigarette lighter
- External battery charger
- External keyboard
- Numeric keypad
- PCMCIA Type I, II, and III cards including flash RAM, SRAM, modem, fax/ modem, and LAN cards
- ActionPort Replicator.

Major Subassemblies

Memory Module Installation

The computer comes with 4MB of memory soldered on the system board. If it has more than 4MB of memory, it already has a memory module installed. Run the Setup program to check the amount of memory installed. You can increase the memory up to 24MB by removing the original module if necessary and installing a 4, 8, 16, or 20MB memory module.

Microprocessor Upgrades

The computer's processor can be upgraded by replacing the original microprocessor with a higher-performance one. The PGA socket on the main board can accept both a processor on a daughter board and a processor installed directly in the socket. A processor on a daughterboard may include 256KB of external cache; all supported processors include 8KB of internal cache. The following table lists the speed and voltage of some of the microprocessors that can be installed.

Microprocessor voltage and frequency

Microprocessor	SUPPLY Voltage (V)	Internal frequency (MHz)	External frequency (MHz)
Intel DX4/75	3.3	75	25
Intel DX4/100	3.3	100	33
Cx486DX2-V80	4.0	80	40

Caution

When installing a new microprocessor, note that two holes are labeled "pin 1." If you are installing a processor chip directly in the socket, insert pin 1 in the second row of holes from the right. You will see an empty row of holes in the socket to the right of the chip. If you are installing a processor on a daughterboard, insert pin 1 in the outer row of holes.

Connector Pin Assignments

Parallel Port Connector (J1)

Pin No.	Signal Name	Pin No.	Signal Name
1	NC	14	AUTO FEED XT
2	DO	15	ERROR
3	D1	16	INIT
4	D2	17	SLCT IN
5	D3	18	GND
6	D4	19	GND
7	D5	20	GND
8	D6	21	GND
9	D7	22	GND
10	ACK	23	GND
11	BUSY	24	GND
12	PE	25	PRT SEL
13	SLCT		

Serial Port Connector(J2)

Pin	Signal	Pin	Signal	Pin	Signal
	Carrier Detect	4	Data Terminal Ready	7	Request to Send
2	Receive Data	5	Signal Ground	8	Clear to Send
3	Transmit Data	6	Data Set Ready	9	Ring Indicator

VGA Connector for an External Monitor (J3)

Pin	Signal	Pin	Signal	Pin	Signal
1	Red	6	Ground	11	NC
2	Green	7	Ground	12	NC
3	Blue	8	Ground	13	Horizontal Sync
4	NC	9	NC	14	Vertical Sync
5	Ground	10	Ground	15	NC

Power Converter Board Connector (22-pin male)

Pin No.	Signal Name	Description
1 to 4	GND	Ground
5	PSW	Indicates the power switch
6	GND	Ground
7	DOCKON	Indicates port replicator status
8	SUSHDD	HIGH (active) when system is entering suspend to hard disk mode
9	SUSCH	HIGH (active) when system is entering suspend to DRAM mode
10	DOCKSW	HIGH (active) when pod replicator is installed
11	INVPWR	For the inverter power source
12 to 14	+5 v	For the system operating voltage
15	+3 v	For the system operating voltage
16	+12 v	For the flash ROM, etc.
17	+3 v	Same as pin 15
18	CHGLED	An output pin to drive the green LED
19	INVPWR	Same as pin 11
20 to 22	VA	A constant voltage form AC adapter

Pin No.	Signal Name	Description
1 to 4	VA	Constant voltage from AC adapter
5	CHGLED	Output pin to drive the orange LED
6	SWITCH	To power on DC/DC converter
7	PWRON	Reserved
8	NC	No connection
9	NC	No connection
10	PWROFF	To bower off DC/DC converter
11 to 14	GND	Ground

Hardware Interrupts

Interrupt	Function
IRQ0	Timer
IRQ1	Keyboard
IRQ2	Cascade
IRQ3	COM2 (2F8H)
IRQ4	COM1 (3F8H)
IRQ5	Available
IRQ6	Diskette Controller
IRQ7	LPT1
IRQ8	Clock/Calendar
IRQ9	Video
IRQ10	Available
IRQ11	Available
IRQ12	Trackpad
IRQ13	Reserved for Coprocessor
IRQ14	Hard Disk Drive Controller
IRQ15	Available

System Memory Map

DMA Assignments

Channel	Device
DMA0	Available
DMA1	Available
DMA2	Diskette Controller
DMA3	ECP
DMA4	Cascade for CTRL 1
DMA5	Available
DMA6	Available
DMA7	Available

System I/O Address Map

Hexadecimal Address	Device
000-01F	DMA Controller 1
020-03F	Interrupt Controller
040-05F	Timer/Counter
060-06F	Keyboard Controller
070-07F	RTC NMI
080-09F	DMA Page Register
0A0-0BF	Interrupt Controller 2
0C0-0DF	DMA Controller 2
0F0	Clear Math Coprocessor Busy
0F1	Reset Math Coprocessor
0F8-0FF	Math Coprocessor
100-1EF	Available
1F0-1F8	Hard Disk Drive
200-207	Game Port
208-277	Available
278-27F	Parallel Port 2
2F8-2FF	Serial Port 2
300-31F	Prototype Card
360-36F	Reserved
378-37F	Parallel Port 1
380-38F	SDLC, Bisynchronous 2
3A0-3AF	Bisynchronous 1
3B0-3BF	Mono Display Printer Adapter
3C0-3CF	Reserved
3D0-3DF	Color/Graphics Monitor Adapter
3E0-3EF	PCMCIA Controller
3F0-3F7	Diskette Drive Controller
3F8-3FF	Serial Port 1

Installation/Support Tips

Using Low Battery Save to HDD and Instant On

- The ActionNote 800 series hard disk drive is partitioned at the factory so that these options can be used. A 25MB area is set aside for the saved data; this ensures that there is enough space for all memory configurations.
- To prepare the hard disk drive, run the PHDISK utility, located in the C:\PM directory. Type the following command at the DOS prompt and press **Enter**:

PHDISK/CREATE

- If you install a new hard disk drive and want to use the Low Battery Save to HDD or Instant On options, you need to leave sufficient space on the disk unpartitioned. The amount of space should equal the system memory plus 2MB. After you run FDISK to partition the drive, you need to run the PHDISK utility to configure the storage space on the drive.
- When the computer is turned on after using the Low Battery Save to HDD or Instant On options, the PCMCIA services are not reinitialized. The computer recognizes SRAM PC cards, but does not recognize most other PC cards. You must reboot to reinitialize the services.

Using an External Monitor

When you connect an external monitor, make sure you turn it on before you turn on the computer. The ActionNote automatically detects the external monitor and displays data on its screen. Press Fn F10 to switch your display from the monitor to the LCD screen or to display on both screens simultaneously.

Using a Serial Mouse

If you connect a serial mouse, you must use the Setup program to disable the built-in trackpad.
