Re: Round Pins in the Israeli Plugs

Dear Sir

I am glad to advise you that the Trade, Industry and Employment Ministry have decided to extend the transition period stated in standard SI 32 part 1 regarding the use of flat round pins in non-rewirable 16 ampere plugs.

The new deadline is now the 28th of September 2006.

Nevertheless we kindly advise you to submit the samples of the new round pins plugs for testing as soon as possible.

Truly yours

Joshua Miller

Head, Standards mark Operation Directorate
& Certification Division
