## POWER RESISTORS INDEX

● <b>DR Series Of Non-Flammable Wire-Wound Power Resistors</b> -----	2
DDR Type 10W -1300W Tubular Ceramic, Fixed-Type Wire-Wound Resistor-----	2
DCR Type 100W -250W Tubular Ceramic, C-Shaped Wire-Wound Resistor-----	2
DNR Type 50W -1300W Tubular Ceramic, Low Inductive Wire-Wound Resistor-----	3
DSR Type 20W -1300W Tubular Ceramic, Variable Wire-Wound Resistor-----	3
● <b>DQ Series Of Non-Flammable Wave-Shape Ribbon-Wound Power Resistors</b> -----	5
DQR Type 75W -2000W Tubular Ceramic, Wave-Type Wire-Wound Resistor-----	5
DQN Type 75W -2000W Tubular ceramic, wave, low inductive wire-wound resistor-----	5
DQS Type 75W -2000W Tubular Ceramic, Wave, Variable Wire-Wound Resistor-----	6
● <b>ZR Series Of Non-Flammable Flat Wire-Wound Power Resistors</b> -----	7
ZZR Type 40W -300W Flat Ceramic Form, Set-Type, Wire-Wound Resistor-----	7
ZQR Type 60W -450W Flat Ceramic Form, Wave-Type Wire-Wound Resistor-----	7
ZNR Type 40W-300W Flat Ceramic Form, Set-Type, Low Inductive Wire-Wound Resistor-----	8
ZQN Type 60W-450W Flat Ceramic Form, Wave-Type, Low Inductance Resistor-----	8
● <b>AL Series Of Large Capacity Metal-Clad Power Resistors</b> -----	9
ASQ Type High Voltage, Aluminum Encased Resistor-----	9
ASH Type High Voltage, Aluminum Encased Resistor-----	10
ASZ Type High Voltage, Aluminum Encased Resistor-----	10
● <b>VR Series Of Variable Wire-Wound Power Resistors</b> -----	11
FVR Type 25W-100W-----	11
● <b>ST Series Of Wire-Wound Starter Power Resistors</b> -----	12
DST Type 500W Tubular Ceramic, Starter Wire-Wound Resistor-----	12
DST Type 600W-1000W Tubular Ceramic, Starter Wire-Wound Resistor-----	12
● <b>SS Series Of Slide-Type Wire-Wound Power Resistors</b> -----	13
BSR Type 200W -1300W Slide-Type Wave, Variable Wire-Wound Resistor-----	13
BSQ Type 300W -2000W Slide-Type Wave, Variable Wire-Wound Resistor-----	13
● <b>Assembly-Type Load Resistor Box</b> -----	14
BDR Type 200W-3200W High Voltage, Assembly-Type Resistance Box -----	14
BQR Type 300W-4800W High Voltage, Assembly-Type Resistance Box -----	14
● <b>ALUMINUM Housed Wirewound Resistors</b> -----	15

# TOKEN MEANS QUALITY AND SERVICE

## NON-FLAMMABLE WIRE-WOUND POWER RESISTORS

### DR RESISTOR SERIES

A tubular ceramic resistor has two terminals, and is wound with copper wire or chromium alloy wire to provide the resistance and then coated with a high temperature, non-flammable resin. After the semi-finished resistor is cool and dry, insulation is applied through a high-temperature process and the mounts are attached. Since the winding is excellent, many taps can be added, impedance is low and the r shape can be altered to produce many types of resistors. These resistors are suitable for educational modeling applications, load testing, industrial machinery, electric power distribution, instruments, automation control installations, etc. For custom specifications, please contact us to discuss the details.

### DDR TYPE 10W -1300W

Tubular Ceramic, Fixed-Type Wire-Wound Resistor																
Power Rating	Dimensions (m/m)														Resistance Range ( $\Omega$ )

## NON-FLAMMABLE WAVE-SHAPE RIBBON-WOUND POWER RESISTORS

### DQ RESISTOR SERIES

A tubular ceramic resistor has two terminals, and is wound with a resistance element consisting of a wave-shaped alloy ribbon. A high temperature, non-flammable resin insulation is applied after cooling and drying through a high temperature process and then the component mounts are attached. The resistance value range is relatively low due to alloy material limitations; see the DR resistor series if high resistance values are required. This product supports the use of numerous taps, has low impedance, and can be fabricated in various shapes to support a wide range of resistor applications. These resistors are suitable for educational modeling applications, load testing, industrial machinery, electric power distribution, instruments, automation control installations, etc. For custom specifications, please contact us to discuss the details.

## NON-FLAMMABLE FLAT WIRE-WOUND POWER RESISTORS

### ZR RESISTOR SERIES

A flat tubular ceramic has two terminals and is wound with either copper wire or chromium alloy wire as a resistor is coated with a high-temperature non-flammable resin. When cooled and dried, it is encapsulated in insulation through a high-temperature process before the final installation of the component mounts. It is mainly utilized for industrial installations where height is limited. Due to the excellent windings, many taps can be added, impedance is low, and PC board is insert able, and usable for many other integrated applications. These resistors are suitable for educational modeling applications, load testing, industrial machinery, electric power distribution, instruments, automation control installations, etc. For custom specifications, please contact us to discuss the details.

## LARGE CAPACITY METAL-CLAD POWER RESISTORS

### AL RESISTOR SERIES

An aluminum-encased resistor consists of an alloy metal coil-type resistance element assembled into an aluminum enclosure. Following high-temperature anodization, the enclosure is filled with a special non-flammable cement paste and after hardening, insulation is applied through a high-temperature process. Since the resistor is embedded in the heat-proof cement, it is not affected by external mechanical force, dusty environments, and extreme duty. It is durable, vibration-proof, dissipates heat well, and has a low temperature coefficient, with resistance varying in direct proportion. Supporting a flexible range of applications, the product is easy to utilize and install. Applications include industrial machinery, load testing, electric power distribution, instruments, and automated control installations. For custom specifications, please contact us to discuss the details.

## VARIABLE WIRE-WOUND POWER RESISTORS

### VR RESISTOR SERIES

A C-shaped ceramic or chromium-alloy wire as a resistance element. Except for the slide contact surface, the entire component is coated with a high-temperature, non-flammable resin. After cooling and drying, insulation is applied through a high-temperature process. Then, a centered rotating adjuster component is installed, which slides along the resistance element and varies the resistance to the desired value. The scope of the application includes educational modeling, load simulations, industrial machinery RPM adjustment, voltage and current adjustment, instruments, and automated control installations. For custom specifications, please contact us to discuss the details.

### PERFORMANCE SPECIFICATIONS

Test Item	Test Methods	Characteristics
Resistance tolerance	JIS-C-5261 5-1	Resistance tolerance $\pm 10\%$
Insulation resistance	JIS-C-5261 6-1 500VDC	100M $\Omega$ min
Dielectric withstanding voltage	JIS-C-5261 7-1 1000VDC 1 minute Between terminal and axis	Free of appearance or structural irregularity
Terminal strength	JIS-C-5261 6-5 3Kg 30 seconds	Free of appearance or structural irregularity $\Delta R/R \leq \pm(2\%+0.1\Omega)$
Vibration	JIS-C-5261 6-6 1.5m/m 10 ~ 50 ~ 10 Hz/min X-Y-Z 2 hours each	Free of appearance or structural irregularity $\Delta R/R \leq \pm(2\%+0.1\Omega)$
Load life	JIS-C-5261 7-7	Free of appearance or structural irregularity $\Delta R/R \leq \pm(5\%+0.1\Omega)$
Full gyration angle	JIS-C-5261 6-1	300 $\pm 5^\circ$ C
Flame retardation	100% - 600% rated power load	US UL-94 flame retardation test V-0 grade noncombustible
Remarks	1. Resistance and resistance tolerance were tested in-house with micro resistance meter. 2. Resistor coating refers to UL-certified data provided by supplier.

FVR type	25W-100W	( $\Omega$ ) Indicates resistance value in units of ohms.	K $\pm 10\%$

## WIRE-WOUND STARTER POWER RESISTORS

### ST RESISTOR SERIES

A tubular ceramic resistor has a fixed number of windings and is wound with alloy wire as a resistance element. The staggering wound is made according to the desired resistance value, followed by the placement of the component mounts. It provides high starter resistor power and is durable, is high temperature-resistant, dissipates heat well, has a low temperature coefficient that varies in direct proportion, and is suitable for application loads involving brief current surges. Due to the set number of windings on the ceramic form, the resistance value range is relatively low.

Tolerance is  $\pm 10\%$  and this product is available in various shapes or in resistance boxes. Suitable for motor starters, load measurements, industrial machinery, electric power distribution, instrumentation, and automation control installations, etc. For custom specifications, please contact us to discuss the details.

### DST TYPE 500W

## SLIDE-TYPE WIRE-WOUND POWER RESISTORS

### SS RESISTOR SERIES

A tubular ceramic form has copper-alloy or chromium-alloy windings as a resistance element, with the resistor mount attachment method the same as the other resistors described. Except for the sliding contact surface on the windings, the entire component is coated with a high-temperature non-flammable resin. The adjustment mechanism is a rotating point that slides directly on the resistance element, which allows variation of the resistance value (See the specifications of the DR series and VR series for exact features). Suitable for education, testing, load simulations, automation control installations, etc. For custom specifications, please contact us to discuss the details.

### BSR TYPE 200W -1300W

## ASSEMBLY-TYPE LOAD RESISTOR BOX

### BOX RESISTOR SERIES

An assembly-type power resistor enclosure contains DR series of and/or DQ series resistors. The box offers excellent protection and safety, in that it not only provides high power load capability and durability, excellent heat dissipation, and a low temperature coefficient that is directly proportional, but also accommodates a flexible range of assembly options for convenient utilization and installation (Refer to the DR series and DQ series features for exact specifications). Suitable for educational modeling applications, load testing, industrial machinery, electric power distribution, instruments and automation control installations, etc. For custom specifications, please contact us to discuss the details.

### BDR TYPE 200W-3200W

## ALUMINUM HOUSED WIREWOUND RESISTORS

### Precision Power Resistors Aluminum Housed (Chassis Mount)

#### FEATURE:

1. High power rating, small size and ultra precision.
2. Standard winding & non-inductive winding types.
3. High stability, strong construction.

#### GENERAL SPEC:

1. Wattage Range: 6 styles to choose ranging from 5 to 250 watts.
2. Resistance Tolerance: 10%, 5%, 3%, 2%, 1%, 0.5% Operating
3. Temperature Range: -55% to +275°C
4. Dielectric Strength: AH-5 AH-10 AH-25 1000V AH-50

Insulation Resistance	Under the same test condition of Dielectric Strength, Load DC500V and measure the Insulation R.	1000MΩ Min.
Terminal Strength	(1) Pull Test (30 sec Min) AH-51kg, AH-10 2.3kg, AH-25, AH-50 4.5kg (2) Torque Test (5~15sec) AH-100 27kg-cm, AH-250 36kg-cm	$\Delta R_{\pm}(0.2\%+0.05\Omega)$ Max.

# TOKEN MEANS QUALITY AND SERVICE

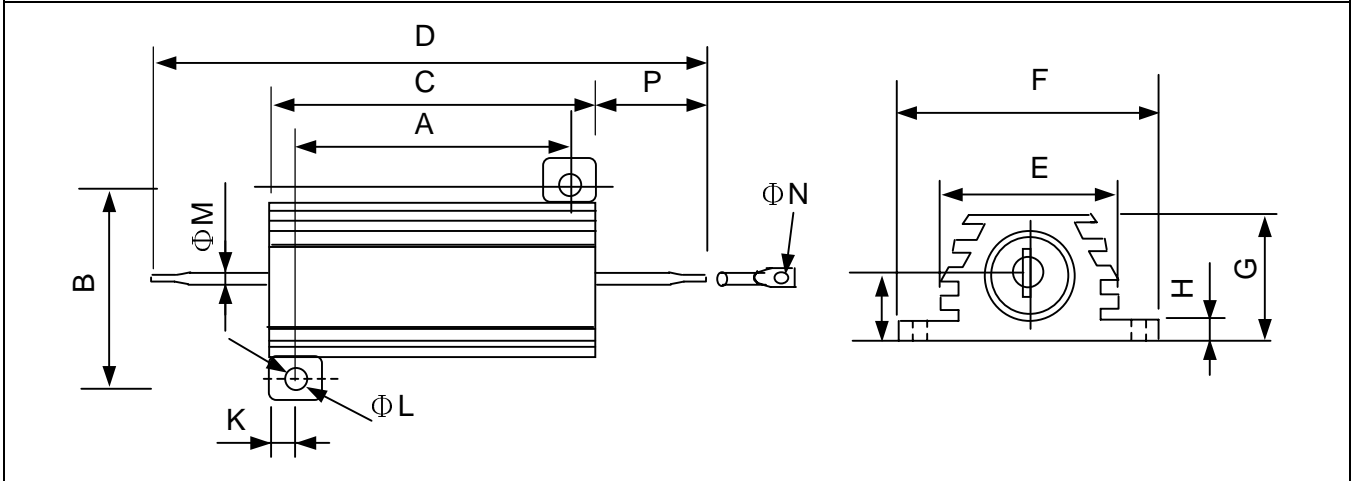

Derating is required to reduce chassis outting area and for high ambient temperatures.  
 Curves: A=5 & 10 watt unites, unmounted. B=25 watt units, unmounted. C=50, 100 & 250 watt units, unmounted

Materials	
Encapsulant	: Silicone
End caps	: Stainless steel
Core	: Ceramic steatite or aluminum
Housing	: Aluminum with hard anodic coating
Element	: Copper-nickel alloy, nickel-chrome alloy or manganese copper
Standard Terminals	: 5~50W Tinned terminals 100~250W Threaded terminals
