Standards Update

## BS 1363 - Amendment 2

18/01/2006

### BS 1363 standards

**(UK style plugs, socket-outlets, adaptors and connection units) – Amendment 2**

The BS1363 standards were reissued in October 2003 to include Amendment 2. The Foreword to these standards advises that the “..for certification purposes, the version of this standard incorporating only amendment No. 1 :1997 remains current until 31 December 2005.”

The Technical Committee responsible for these standards, PEL/23, has confirmed that this date is extended until 31 December 2006. This extension is likely to be confirmed by Corrigenda published early in 2006.

Throughout 2005 ASTA BEAB has been working with its clients to successfully upgrade many existing approvals from Amendment No. 1 to include Amendment No. 2. This process will continue throughout 2006.

For any questions concerning the above or any other issue concerning ASTA Licenced products, please contact the undersigned.

R W Hayward  
Engineering Manager (TDIP)
