## DUAL OP AMP AND VOLTAGE REFERENCE

AP4300

### General Description

The AP4300 is a monolithic IC specifically designed to regulate the output current and voltage levels of switching battery chargers and power supplies.

The device contains two operational amplifiers and a precision shunt regulator. Op Amp 1 is designed for voltage control, whose non-inverting input internally connects to the output of the shunt regulator. Op Amp 2 is for current control with both inputs uncommitted. The IC offers the power converter designer a control solution that features increased precision with a corresponding reduction in system complexity and cost.

The AP4300 is available in standard packages of DIP-8 and SOIC-8.

### Features

#### Op Amp

- Input Offset Voltage: 0.5mV
- Supply Current: 250 $\mu$ A per Op Amp at 5.0V Supply Voltage
- Unity Gain Bandwidth: 1MHz
- Output Voltage Swing: 0 to ( $V_{CC}$  - 1.5) V
- Power Supply Range: 3 to 18V

#### Voltage Reference

- Fixed Output Voltage Reference: 2.5V, 2.6V
- Voltage Tolerance: 0.5%, 1%
- Sink Current Capability from 0.1 to 80mA

### Applications

- Battery Charger
- Switching Power Supply

SOIC-8

## Absolute Maximum Ratings (Note 1)

| Parameter   | Symbol    | Value                   |            | Unit |
|---|-----------|-------------------------|------------|------|
| Power Supply Voltage ( $V_{CC}$ to GND)           | $V_{CC}$  | 20                      |            | V    |
| Op Amp 1 and 2 Input Voltage Range (Pins 2, 5, 6) | $V_{IN}$  | - 0.3 to $V_{CC} + 0.3$ |            | V    |
| Op Amp 2 Input Differential Voltage (Pins 5, 6)   | $V_{ID}$  | 20                      |            | V    |
| Voltage Reference Cathode Current (Pin 3)         | $I_K$     | 100                     |            | mA   |
| Power Dissipation                                 | $P_D$     | DIP-8<br>SOIC-8         | 800<br>500 | mW   |
| Storage Temperature Range                         | $T_{STG}$ | -65 to 150              |            | °C   |
| ESD Protection Voltage (Machine Model)            |           | > 200                   |            | V    |

Note 1: Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

## Recommended Operating Conditions

| Parameter           | Min | Max | Unit |
|---------------------|-----|-----|------|
| Supply Voltage      | 3   | 18  | V    |
| Ambient Temperature | -40 | 105 | °C   |
