

“Digital video recorder (DVR)” means a device which can record video signals onto a hard disk drive or other device that can store the images digitally. “DVR” does not include models that have an EPG function.”

“Electronic programming guide (EPG)” means an application that provides an interactive, onscreen menu of TV listings, and that downloads program information from the vertical blanking interval of a regular TV signal.

“Mobile phone” means a telephone that is not a wireline telephone.

“No-load mode” means the condition in which the input of a power supply is connected to an AC source consistent with the power supply’s nameplate AC voltage, but the output is not connected to a product or any other load.

“Personal digital assistant” (PDA) means a lightweight, hand-held computer used as a personal organizer.

“Point of Deployment (POD)” means a card which enables a TV to have secure conditional access to a cable or satellite system.

“Single-voltage external AC to DC or AC to AC power supply” means a device that:

- (1) is designed to convert line voltage AC input into lower voltage DC or AC output;
- (2) is able to convert to only one DC or AC output voltage at a time;
- (3) is sold with, or intended to be used with, a separate end-use product that constitutes the primary load;
- (4) is contained within a separate physical enclosure from the end-use product;
- (5) is connected to the end-use product via a removable or hard-wired male/female electrical connection, cable, cord, or other wiring;
- (6) does not have batteries or battery packs that physically attach directly (including those that are removable) to the power supply unit;
- (7) does not have a battery chemistry or type selector switch and an indicator light; or, does not have a battery chemistry or type selector switch and a state of charge meter;
- (8) has a nameplate output power less than or equal to 250 watts.

“Television (TV)” means a commercially-available electronic product consisting of a monitor, which may or may not have a tuner/receiver, encased in a single housing, which is designed to receive and display an analog or digital video signal received from a terrestrial, satellite, cable, or broadband source. “Television” does not include multifunction TVs which have VCR, DVD, DVR, or EPG functions or which have a POD card slot.

“TV standby-passive mode” means the appliance is connected to a power source, produces neither sound nor vision but can be switched into another mode with the remote control unit or an internal signal.
