

Features

- High efficiency – **89% @ 5V / 4A Full Load**
- Save **45%** board space
- Standard pin out; **Fully replaceable with 2"x1" package**
- **2250VDC I/O Insulation** (basic insulation)
- IEC950/EN60950/UL1950 pending
- Patented architecture and control circuitry
- 3.3V, 5V, 12V, 15V, $\pm 12V$ or $\pm 15V$ outputs
- High power up to **20W**
- Free air convection form **-40°C to +60°C**
- Input under-voltage lockout
- Output current limit and short circuit protection
- Output over-voltage and over-temperature protection

Description

The new **ESO** series converters are targeted specifically at the telecommunication, industrial electronics, mobile telecommunication, and distributed power markets. These 12 members accept two wide input voltage ranges from 18 to 36 & 36 to 75 VDC and provide single or dual outputs. All models feature fixed switching frequency operation, input under voltage lockout, over-temperature protection, output over-voltage protection, output current limiting, and short circuit protection.

The converters combine creative design concept and conservative component selection to achieve very high reliability, high performance and low cost.
