

LV5026M

『DATA SHEET』

1. Overview

LV5026M is a High Voltage LED drive controller which drives LED current up to 3A with external MOS FET. LV5026M is realized simple LED circuits with a few external parts. It corresponds to various wide dimming controls including the TRIAC dimming control.

2. Functions

- .High Voltage LED Controller
- .Various Dimming Control
 - TRIAC & Analog Input & PWM Input
- .Selectable Switching frequency [50 kHz or 100 kHz, open: 50 kHz]
- .Low noise switching system
 - 5 stages skip mode Frequency
 - Step drive
- .Selectable Reference Voltage
 - Internal 0.6V & External Voltage
- .Short Protection Circuit
- .External Input Synchronous & non-External Input synchronous function adopted
- .Soft Start function

3. Specifications

Maximum Ratings at Ta = 25°C

Parameter	Symbol	Conditions	Ratings	unit
Maximum Input voltage	VINmax		42	V
Allowable power dissipation	Pd max		1.0	W
Junction temperature	Tj		150	°C
Operating temperature	Topr		-30~ +125	°C
Storage temperature	Tstg		-40~ +150	°C

■ Any and all SANYO Semiconductor Co.,Ltd. products described or contained herein are, with regard to "standard application", intended for the use as general electronics equipment (home appliances, AV equipment, communication device, office equipment, industrial equipment etc.). The products mentioned herein shall not be intended for use for any "special application" (medical equipment whose purpose is to sustain life, aerospace instrument, nuclear control device, burning appliances, transportation machine, traffic signal system, safety equipment etc.) that shall require extremely high level of reliability and can directly threaten human lives in case of failure or malfunction of the product or may cause harm to human bodies, nor shall they grant any guarantee thereof. If you should intend to use our products for applications outside the standard applications of our customer who is considering such use and/or outside the scope of our intended standard applications, please consult with us prior to the intended use. If there is no consultation or inquiry before the intended use, our customer shall be solely responsible for the use.

■ Specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

Recommended Operating Conditions at Ta = 25°C

Parameter	Symbol	Conditions	Ratings	unit
Input voltage	VIN		8.5~24	V

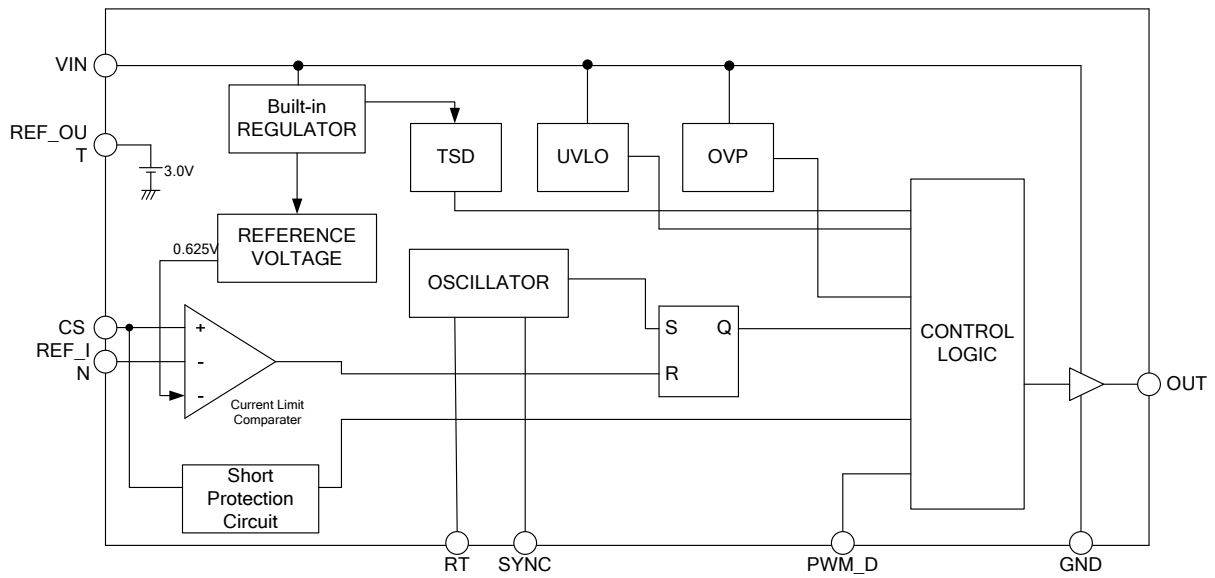

Electrical Characteristics at Ta = 25°C, VIN = 12V, unless otherwise specified.

Parameter	Symbol	Conditions	Ratings			unit
			min	typ	max	
【Reference Voltage block】						
Built-in Reference Voltage	VREF		0.600	0.625	6.50	V
VREF Vin regulation	VREF_L N	VIN=8.5~24V		±0.5		%
Reference Output Voltage	REFOU T			3.0		V
—Maximum load	REFOU T_MAX		2			mA
—equivalent output impedance	REFOU T_RO			40		ohm
【Under Voltage Lockout】						
Operation Start Input Voltage	UVLOO N		8.5	9.5	10.5	V
Operation Stop Input Voltage	UVLOOF F		6.5	7.5	8.5	V
Hysterisys Voltage	UVLOH			2		V
【Oscillation】						
Frequency	FOSC	RT=OPEN		25		kHz
Skip Frequency range	FSKIP	5 Stages		±3.5% ±7%× FOSC		kHz
Maximum Duty	MAXDut y			65		%
【Comparator】						
Input offset Voltage (Between CS and VREF)	VIO_VR			1	10	mV

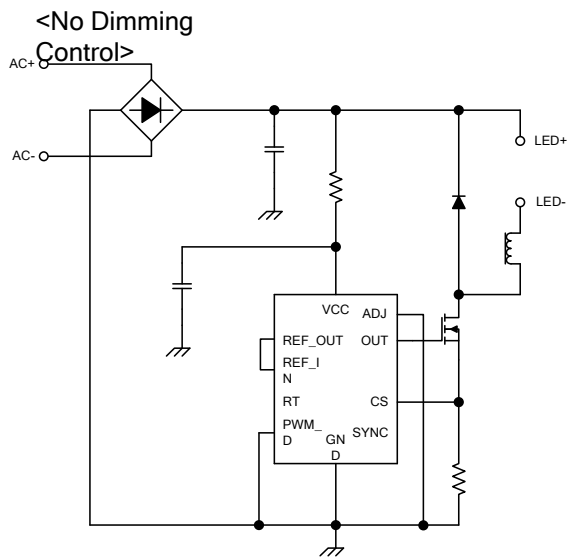

Input offset Voltage (Between CS and REFOUT)				1	10	mV
Input current	IIOCS			120		nA
	IIOREF			60		nA
CS terminal max voltage	VOM				1	V
malfunction prevention mask time	TMSK			150		ns
【PWM_Dimming Input】						
PWM_D OFF Voltage	VOFF		2		5	V
PWM_D ON Voltage	VON		0		0.6	V
【Thermal protection Circuit】						
Thermal shutdown Temperature	TSD	*Design guarantee		165		°C
Thermal shutdown hysteresis	Δ TSD	*Design guarantee		30		°C
【Drive Circuit】						
OUTPUT sink current	IOI		500	1000		mA
OUTPUT source current	IOO			120		mA
Minimum On time	TMIN			200	300	ns
【デバイス全体】						
UVLO mode VIN current	ICCOFF	VIN<UVLOON		80	120	uA
Normal mode VIN current	ICCON	VIN>UVLOON OUT=OPEN		0.6		mA
【VIN Over Voltage protection Circuit】						
VIN Over Voltage protection Voltage	VINOVP		24	27	30	V
【CS terminal abnormal sensing Circuit】						
Abnormal sensing Voltage	CSOCP			1.9		V

*: Design guarantee (value guaranteed by design and not tested before shipment)

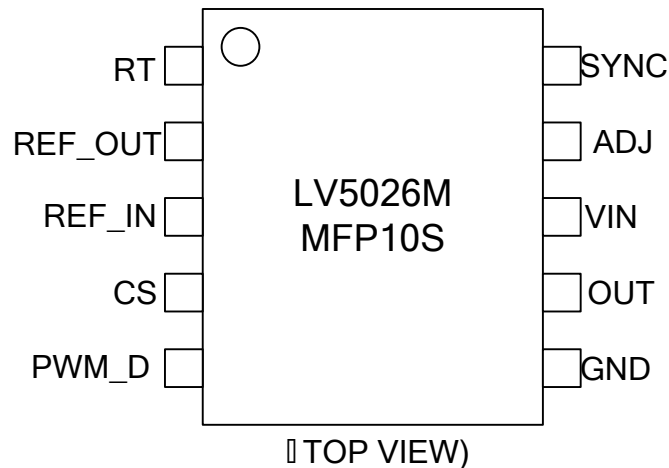

4. Block Diagram

5. Sample Application Circuit

6. Pin Assignment

7.Pin Function

Pin No.	Pin name	Function
1	RT	Switching Frequency selection Pin. [L or Open : 50kHz Switching / H(2V – 5V) : 100 kHz Switching]
2	REF_OUT	Built-in 3V Regulate out Pin.
3	REF_IN	External LED current Limit Setting Pin. If less than VREF (0.625V) voltage is input, Peak current value is used at the input voltage. If more than Vref voltage is input, it is done at VREF voltage.
4	CS	LED current sensing Pin. If this terminal voltage exceeds VREF (or REF_IN), external FET is OFF. The switching is stopped until falling below 0.9V when the voltage of the terminal exceeds 1.2V. And if the voltage of the terminal exceeds 1.9V, LV5026M turns to latch-off mode.
5	PWM_D	PWM DIMMING pin. [L:normal operation, H:Stop operation, OPEN:forbidden]
6	GND	GND pin.
7	OUT	Driving the external FET Gate Pin.
8	VIN	Power supply Pin. Operation : VIN>UVLOON Stop: VIN<UVLOOFF Switching Stop : VIN>VINOVP
9	ADJ	LED current adjusting pin
10	SYNC	External synchronized pin.

8. CS terminal abnormal sensing function

If the voltage of the terminal exceeds 1.9V, LV5026M turns to latch-off mode and switching is stopping.

- SANYO Semiconductor Co.,Ltd. assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein.
- SANYO Semiconductor Co.,Ltd. strives to supply high-quality high-reliability products, however, any and all semiconductor products fail or malfunction with some probability. It is possible that these probabilistic failures or malfunction could give rise to accidents or events that could endanger human lives, trouble that could give rise to smoke or fire, or accidents that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO Semiconductor Co.,Ltd. products described or contained herein are controlled under any of applicable local export control laws and regulations, such products may require the export license from the authorities concerned in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written consent of SANYO Semiconductor Co.,Ltd.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO Semiconductor Co.,Ltd. product that you intend to use.
- Information (including circuit diagrams and circuit parameters) herein is for example only; it is not guaranteed for volume production.
- Upon using the technical information or products described herein, neither warranty nor license shall be granted with regard to intellectual property rights or any other rights of SANYO Semiconductor Co.,Ltd. or any third party. SANYO Semiconductor Co.,Ltd. shall not be liable for any claim or suits with regard to a third party's intellectual property rights which has resulted from the use of the technical information and products mentioned above.
